

RYOJI KONDO

PROFESSIONAL SUMMARY

- Full stack software engineer seeking graduate or junior opportunities in frontend, backend, full stack and AI engineering.
- Final year Master of Computer Science student at the University of Sydney, graduating in November 2026.
- Builds AI enabled applications using LLM APIs, including an industry sponsored scam call detection system developed for a real client.
- Identified usability issues in Albion Place Hotel's website and internal systems, proposed improvements to management and collaborates with an external vendor on implementation.
- Experienced in using Claude and Codex to accelerate development while independently reviewing, testing and verifying the resulting code.
- Brings six years of high school teaching experience, with strengths in teamwork, stakeholder communication and explaining complex concepts clearly.

PROFESSIONAL EXPERIENCE

- **Albion Place Hotel (Sydney, Australia) | Software Development Contributor, Bartender | February 2025 – Present**
 - Identified eight mobile usability failures on the venue's website, wrote the improvement proposal and build it into a working prototype, presented both to management. Now co-developing the agreed changes with the venue's external web vendor, who maintain the production site, and continue gathering improvement requests from managers and floor staff.
 - Improve the frontend user experience and backend functionality for online reservations, customer enquiry forms, and online ordering.
 - Worked inside an existing production integration between the bar's ordering platform and its ticket printing workflow, turning informal requests from non-technical staff into changes that held up during live service.
- **Saitama Prefecture Government Schools (Saitama, Japan) High School English Teacher | April, 2018 – August, 2024**

PROJECT EXPERIENCE

- **OMIYAcappella — Bilingual community website (HTML, CSS, JavaScript, Python, Cloudflare Workers) | 2026**

A production website built to improve recruitment for an a cappella community that was previously discoverable only through its X account. Includes performance galleries, analytics, an enquiry form and SEO using targeted content, canonical URLs, structured data and a sitemap. A daily automated pipeline imports the group's latest social media posts.
- **AI-powered scam-call detection system (Kotlin, Python, Shizuku, GLM-ASR) | 2026**

An industry-sponsored Android project that captures and transcribes live-call audio without root access, then analyses suspicious signals through multiple AI layers. I work on real-device testing, Shizuku integration, on-device rules and UI, with the system designed to warn users within 60 seconds.
- **MedAI Pro — Constrained-LLM clinical intake prototype (React, TypeScript, Node.js, PostgreSQL) | 2025**

An AI healthcare assistant that turns a doctor's treatment plan into personalised support for diet, exercise and medication. It helps patients manage their health between appointments while giving doctors continuous monitoring data to support consultations and clinical decisions.

EDUCATION

The University of Sydney (NSW, Australia)

Master of Computer Science

2025-

Tsuru University (Yamanashi, Japan)

Bachelor's of Art Degree in School Education

2012-2015

TECHNICAL SKILLS

- **AI-assisted development** — Claude and Codex for building, refactoring and reviewing production code, with agent harnesses (MCP servers, project-level instruction files, custom skills and subagents) and my own eval scripts to keep the output verifiable.
- **Languages** — Python, TypeScript, JavaScript, Java, SQL, HTML/CSS
- **Backend & APIs** — Gemini API, OpenAI API, FastAPI, Node.js, Express, Spring Boot, REST API design, JWT authentication, role-based access control
- **Frontend** — React, Next.js, Vite, responsive web development
- **Data** — PostgreSQL, MongoDB, MySQL, relational schema design, migrations
- **Infrastructure & Quality** — Docker, Git, GitHub Actions CI, pytest, JUnit, unit and integration testing, structured logging, input validation
- **Architecture** — Distributed systems, SAGA, transactional outbox, idempotency, RabbitMQ, MVC
- **Languages spoken** — Japanese (native), English (professional working proficiency)

CERTIFICATIONS

- Teaching certificate (for grade 1 to 6 Japanese elementary school)
- Teaching certificate (for grade 7 to 12 Japanese junior high school and high school as a foreign language teacher (English))
